Education

Savitribai Phule Pune University (SPPU)

B.E. in Artificial Intelligence & Data Science

Nov 2022 – May 2026

Pune, India

– CGPA: 9.30

Experience

NeuAI Labs

Data Science Intern

Dec 2024 – Feb 2025

Remote

- Analyzed **10K+ Uber ride records** using Python to identify peak demand hours and ride distribution patterns.
- Performed data cleaning and preprocessing using **Pandas and NumPy** to prepare structured datasets for analysis.
- Created data visualizations using **Matplotlib and Seaborn** to analyze ride frequency, user behavior, and trip distribution trends.
- Applied analytical thinking and **problem-solving techniques** to extract insights from transportation datasets.

Future Interns

Full Stack Developer Intern

Mar 2025 – Apr 2025

Remote

- Developed a **Weather Forecast Web Application** using React.js with responsive UI.
- Integrated real-time weather data through external **REST APIs** and processed responses in **JSON format**.
- Built reusable frontend components and handled asynchronous API requests for dynamic data rendering.
- Improved website performance and user experience by optimizing frontend rendering and API calls.

Projects

AI-Based Personalized Learning & Career Guidance Platform

TypeScript, Gemini API, PostgreSQL, Drizzle ORM, Inngest

2025

- Developed an **AI-powered full stack platform** that provides personalized learning recommendations, career roadmaps, resume analysis, and automated cover letter generation.
- Designed an interactive **Career Roadmap Generator** using graph-based **data structures and recommendation algorithms**.
- Implemented full-stack architecture using **Next.js, PostgreSQL (Neon), Drizzle ORM, Clerk authentication, and Stripe payment integration**.

Uber Ride Data Analysis

Python, Pandas, NumPy, Matplotlib, Seaborn

2024

- Performed comprehensive **Exploratory Data Analysis (EDA)** using Python, Pandas, and NumPy to analyze ride demand patterns and peak usage hours.
- Analyzed ride frequency across different **time intervals, weekdays, and months** to identify high-demand periods.
- Generated analytical reports and visual insights to support **data-driven decision making** for ride demand optimization.

Technical Skills

Programming Languages: Java, Python, C++, JavaScript

Frontend: HTML, CSS, Tailwind CSS, React.js

Backend: Node.js, SpringBoot, REST API Development

Data Science: Pandas, NumPy, Scikit-learn, Exploratory Data Analysis

Databases: SQL, PostgreSQL, MongoDB

Tools: Git, GitHub, VS Code, Kaggle

Certifications

- Data Structures & Algorithms — Udemy
- Data Science — Oracle
- Software Development — Microsoft

Achievements

- Solved **200+ Data Structures and Algorithms problems** on LeetCode, strengthening problem-solving skills.
- Completed **two industry internships** in Data Science and Full Stack Development.
